- Coded software updates and alterations based on detailed design specifications.
- Developed and presented findings and solutions to audiences including senior executives and stakeholders.
- Wrote reports and had meetings with the management and client to provide updates on project progress.

PROJECT DETAILS

PROJECT 1: COAST SOCCER LEAGUE

Technologies:	PHP(Yii), Javascript, MySQL, Ajax, HTML, CSS
Role/Responsibility:	• Additional features to be added to existing web pages as per client requirement. • Prepared required documentation both at the program level and user level and maintained records to document revisions.
Environment/Tools:	Ubuntu, VS Code, GIT, Postman, FileZilla, etc.
Description:	Coast Soccer League is the largest youth soccer gaming circuit in the United States. Here we manage the admin dashboard and then the backend part of the CSL App and Referee App.

PROJECT 2: TRT SPORTS

Technologies:	PHP(Laravel), Javascript, MySQL, Ajax, HTML, CSS
Role/Responsibility:	• Participated in analysis, design, and new development of applications. • Implementation of rest API services using laravel framework and from scratch. •Used Ajax for every page for dynamically displaying the data without a page refresh.
Environment/Tools:	Ubuntu, VS Code, GIT, Postman, etc.
Description:	TRT Sports is a Football Tournament Management System in which we can manage more than one tournament at the same time. It's a successor of the Coast Soccer League Application. The system contains the admin dashboard which has many features like scheduling the games, updating scores, etc.
